

DIE-CUT DECAL PRINT FILE SET UP

Bleed area

(Min. 1/8" larger than the cut line)

Make your artboard at this size. Make sure your background extends to fill the whole bleed area to avoid white edges!

Cut Line

This is where we aim to cut in production. Please indicate your cutline 100% Magenta (CMYK: 0/100/0/0)

Safe area

(1/8" smaller than the cut line)

Make sure important aspects of your design like text and logos are inside the safe area to avoid being cut off.

Image

Artwork should be a vector PDF or images at 300dpi to avoid pixelated images. Please don't forget to embed all images.

Save File as PDF

Save files as PDF or AI (Adobe Illustrator) files.
Please outline all fonts and delete guidelines!

Colour

Set your colour profile as CMYK instead of RGB, which cannot always be replicated. We **cannot** be responsible for variances in final printed colours. Printed samples are available at an additional cost.

Additional Files

Please provide all font files and original image files if any editing is required. All PDF images must be embedded in the document.
